

Our Seed. Your Soil. Total Success.

LG Brand Alfalfa

Fall Dormancy Rating: 3

Winter Hardiness: VWH

Persistence: EX

Cutting Schedule: 3-4

Recovery: EX

Characteristics

- High-yielding, superior quality, outstanding winterhardiness
- **eXclaim** is flexible to accommodate three and four cut harvests
- Excellent disease resistance with no soil type limitations
- Solid 78% multifoliate leaf expression

Appearance at Bud Stage

- An attractive medium-tall plant with a dense canopy
- Medium-dark green foliage

Performance & Quality

- Multiyear testing shows that LG **eXclaim** alfalfa is an elite variety in yield and quality against other leading commercial varieties.

Superior Quality, Superior Yield

Yield and Quality Comparisons

Entry	CP	ADF	NDF	NDFD	RFQ	Tons per Acre	Milk per Ton lbs/ton	Milk per Acre lbs/acre
eXclaim	21.4	32.9	38.1	45.5	160	6.2	2,883	17,509

Nematodes:

Stem	N/A
Northern Root Knot	N/A

Management Keys

eXclaim is an elite variety that accommodates both three and four cut systems with industry leading yields while maintaining forage quality in each system. Medium to later maturity to one-tenth flower accommodates each of these cutting systems—thus giving growers peace of mind that the forage quality is being maintained during periods of challenging weather. **eXclaim** is well adapted across fall dormancy zones 3, 4 and 5 with little to no soil or management limitations. **eXclaim** can be used for hay or haylage production.
