

PRODUCT INFORMATION

C2126RX has superior yield performance. Medium-tall plants sport many podded side branches.

- Superior yield performance and is a stellar line in this maturity.
- Medium-tall plants sport many podded side branches.
- Disease package protects against IDC, PRR, BSR, SDS and SCN.
- Handles varying soil and fertility situations with exceptional stress and drought tolerance.

MANAGEMENT TIPS

Adapts well into no-till and minimum tillage. Handles varying soil and fertility situations. Exceptional stress and drought tolerance.

9 = Excellent 1 = Poor N/A = Not Available

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
