

## PRODUCT INFORMATION

C2255R2, a high yielding product in the early Group II line-up, offers an excellent disease profile. Medium-tall plants are widely adapted across the upper Midwest.

- A high yielding product in the early Group II line-up with very stable consistent performance.
- Medium-tall plants emerge well, have very good standability, and are widely adapted across the upper Midwest.
- Excellent disease profiles with superior ratings for IDC, BSR, PRR, SDS.
- Excellent adaptability into no-till, minimum tillage and well adapted to all row spacings.

## PLANT CHARACTERISTICS

	1	2	3	4	5	6	7	8	9
Emergence	█	█	█	█	█	█	█	█	█
Standability	█	█	█	█	█	█	█	█	█
Shatter Resistance	█	█	█	█	█	█	█	█	█
Plant Height .....	MT								
Plant Type .....	MB								
Pubescence .....	Lt. Tawny								
Flower Color .....	Purple								
Hilum .....	Black								
Pod Color .....	Brown								

## PREFERRED PLACEMENT ZONE

## MANAGEMENT TIPS

Excellent adaptability into no-till and minimum tillage and well adapted to all row spacings. Widely adapted across the upper Midwest. Handles stress and non-stress environments equally as well.

## MANAGEMENT PRACTICES

	1	2	3	4	5	6	7	8	9
Poorly Drained Soils	█	█	█	█	█	█	█	█	█
Marginal Soils	█	█	█	█	█	█	█	█	█
Productive Soils	█	█	█	█	█	█	█	█	█
Adapt to No-Till	█	█	█	█	█	█	█	█	█
Early Vigor	█	█	█	█	█	█	█	█	█

## DISEASE RATINGS

Cyst Nematode Resistance ..... R3, MR14  
 Phytophthora Race Resistance ..... Rps1c

	1	2	3	4	5	6	7	8	9
Phytophthora Tolerance	█	█	█	█	█	█	█	█	█
Brown Stem Rot	█	█	█	█	█	█	█	█	█
Iron Deficiency Chlorosis	█	█	█	█	█	█	█	█	█
Sclerotinia White Mold	█	█	█	█	█	█	█	█	█
Sudden Death	█	█	█	█	█	█	█	█	█
Frogeye Leaf Spot	█	█	█	█	█	█	█	█	█
Charcoal Rot	█	█	█	█	█	█	█	█	█
Stem Canker	█	█	█	█	█	█	█	█	█

9 = Excellent 1 = Poor N/A = Not Available

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
